

Introducing the roof that speaks for itself.

For years, we've been telling you about the quality of a Siplast Roof. Now, we let the roof do the talking.

Introducing RoofTag.

Siplast is proud to offer RoofTag: RF Technology for Roof Asset Identification. By choosing Siplast roof membranes with RoofTag RF Chips factory-embedded in the sheets, access to Certificate of Analysis data, product information, and job information is possible by scanning the installed roof membrane.

The Siplast Certificate of Analysis.

The Siplast Certificate of Analysis documents the results of stringent quality control tests performed on the specific lot of material delivered to a job site. As the only manufacturer willing to routinely present this information, Siplast provides an extra measure of assurance that your customer is getting what you specified, and what they paid for.

Until now, the innovative Siplast Certificate of Analysis has been printed on a sheet of paper. With RoofTag, it's embedded in a sheet of roofing. It's our signature, and your assurance of our commitment to both quality and your project.

For a demonstration of RoofTag, please contact your local Siplast Representative, call 1-800-922-8800, or visit our web site at www.siplast.com.

The RoofTag RFID Chip is factory-embedded in Siplast Roof Membranes.
