we can assist with
your project goals.

Our integrated single-source vegetated roof assemblies give you the flexibility to meet your design intent with the quality and peace of mind you've come to expect from Siplast.

Extensive

ParaGREEN Extensive layered vegetated roof assemblies can be tailored to fit within project thresholds and maximize performance. The assembly can be planted with ParaGREEN Sedum Mat or extensive containerized plant material.

Extensive Modular

ParaGREEN vegetated roof module arrives to the project fully vegetated, delivering instant impact. It is 12"x24", and available in 4", 6", or 8" fixed depths.

Semi-Intensive

ParaGREEN Semi-Intensive assemblies feature lawn or naturalized grass areas, and deeper media profiles to cater to the horticultural demands of turf and naturalized plants.

Intensive

ParaGREEN Intensive vegetated roof assemblies can be tailored to fit many applications, from amenity deck planters to immersive landscapes over podium structures, with plant material ranging from the herbaceous to large mature trees.

Amenity Space

Siplast's integrated amenity offerings provide you with the tools to define your community space.

Concrete, Porcelain, and Wood Tiles

Pedestal set hardscape solutions provide a level walking surface over low slope roof surfaces, and easy access to membranes and mechanicals that may be located below.

Integrated Stormwater Solutions

From extensive vegetated roofs addressing detention requirements to stormwater planters employed for passive irrigation, Siplast understands that stormwater management requirements vary from region to region. That's why we offer customized stormwater management solutions to meet your project's needs.
