PARADIENE® 20 TS SA F

Commercial Product Data Sheet

Paradiene 20 TS SA F is the modified bitumen base ply designed for use in homogeneous multi-layer modified bitumen roof membrane systems, Paradiene 20 TS SA F consists of a lightweight random fibrous glass mat impregnated and coated with an elastomeric styrene-butadiene-styrene (SBS) modified bitumen and is covered with a perforated plastic burn-off film. The unique back surface design consists of factory-applied, heat-activated adhesive stripes combined with a proprietary acrylic coating between the stripes, which provides for uniform bonding of approximately 50% of the total surface area of the sheet.

Application

Refer to the Siplast Technical Guide for detailed application information and slope limitations. Paradiene 20 TS SA F is lapped 3 inches (76 mm) side and end.

Storage and Handling

All Siplast roll roofing products should be stored on end on a clean, flat surface. Rolls should not be dropped on ends or edges or stored in a leaning position. Deformation resulting from these actions will make proper installation difficult. All roofing products should be stored in a dry place out of direct exposure to the elements and should not be double stacked. Material should be handled so that it remains dry prior to and during installation.

See product packaging and the Safety Data Sheet for specific information on the safe handling of this product.
