

PARAGREEN™ ENTANGLED DRAIN MAT

Commercial Product Data Sheet

ParaGREEN™ Entangled Drain Mat is a roll product consisting of an entangled polypropylene mesh with fused, entangled filaments and a geocomposite fabric bonded to one side. The entangled filaments are molded into a square waffle pattern that maintains a flexible design. The ParaGREEN Entangled Drain Mat to be used in conjunction with Siplast's Mineral Wool Retention Mat to provide an air layer and drainage path beneath the retention mat.

Contact Siplast for additional information on approved product uses.
