

## PRO BASE Commercial Product Data Sheet

Pro Base is a high performance modified bitumen base play specifically designed for use in Parapro and Paraflex Roof Membrane Systems. Pro Base consists of a lightweight random fibrous glass mat impregnated and coated with high quality styrene-butadienestyrene (SBS) modified bitumen. The unique top surface is factory coated with a proprietary Syntan ${ }^{\circledR}$ acrylic coating.

## PRODUCT INFORMATION

## Application

Refer to the applicable Siplast Technical Guide for detailed application information and slope limitations. Pro Base is lapped 3 inches ( 76 mm ) side and end.

## Storage and Handling

All Siplast roll roofing products should be stored on end on a clean, flat surface. Rolls should not be dropped on ends or edges or stored in a leaning position. Deformation resulting from these actions will make proper installation difficult. All roofing products should be stored in a dry place out of direct exposure to the elements and should not be double stacked. Material should be handled so that it remains dry prior to and during installation.

See product packaging and the Safety Data Sheet for specific information on the safe handling of this product.

## Packaging

Pallet: 41 in $\times 48$ in ( $104 \mathrm{~cm} \times 122 \mathrm{~cm}$ ) wooden pallet
Rolls Per Pallet: 25
Pallets Per Truckload: 18
Minimum Roll Weight: $89 \mathrm{lb}(40.4 \mathrm{~kg})$
